

# ASWF / \* ACADEMY SOFTWARE FOUNDATION

## Annual Review for rez

# Project Info

## Brief Description:

*A lightweight cross-platform package manager written in Python  
Build and release packages to a central repository,  
then consume them in standalone configured environments.*

## TSC Chairperson:

*Allan Johns <nerdvegas@gmail.com>*

## Project TAC Delegate:

*Stephen Mackenzie <maxnbk@gmail.com>*

## TSC Members and Affiliations:

# Project Origins

- V1 implementation at Dr.D Studios circa 2011
  - Author previously working at MPC London, where version management was increasingly problematic
  - Both studios' systems tightly coupled show configuration with package versioning, and were problematic
  - Rez (drd-config at the time) sought to address these issues
  - Python solver, everything else bash
  - Primarily used to manage C++ packages
  - Open sourced circa 2013 when Dr.D Studios was closed down
- V2 implementation at Method Studios, LA, circa 2014
  - Much more extensible - pluggable package repos, build systems, shell languages
  - Cross platform, monitoring
  - Bash requirement removed - agnostic package commands language introduced
  - Used to manage both python and C++ packages
  - Animal Logic one of the first studios to adopt outside of Method

# Project Challenges vs Positives

- |   |                               |
|---|-------------------------------|
| 1. Difficulties blocking contribution   | 1. Community engagement       |
| a. Documentation                        | 2. Successful companies using |
| b. Niche domain                         | 3. Flexibility                |
| c. Testing / debugging / logging        |                               |
| 2. User support                         |                               |
| 3. Top project requests                 |                               |
| 4. Dependence on Allan                  |                               |
| 5. Attracting Long-term contributors    |                               |
| 6. Still early days of our ASWF process |                               |
| 7. Very little company support*         |                               |
| 8. Lull in activity*                    |                               |

# Top Requested Features

1. “Provides”
2. Better Windows shell support
3. Better rez-pip
4. Cloud package repositories
5. Caching-oriented
6. Robust starter rez recipe set

# Developments

1. Windows Shell Pathing PR
2. S3 / MongoDB PR + proposal  
being written
3. Early days rez-pip new prototype

# Conclusion / Q & A

Thank you for your ongoing support!
